

New Information from CONEC

## Zinc Diecast version available

The existing product line of IP67 rated RJ45 and USB connectors featuring bayonet locking design in accordance with IEC61076-3-106 type 1, is now available with zinc diecast housings.

## RJ45 Industrial Ethernet IP67 and USB IP67

This series is ideal for Ethernet and USB applications in harsh environments, outdoor usage, industrial, communication and factory automation systems.

A simple mating of plug and receptacle with the bayonet design provides a solid connection.

Compatibility between enclosures made with various materials is adhered to in accordance to IEC61076-3-106.

Die cast housings are nickel plated and provide excellent shielding against EMI-RFI.

RJ45 series can be supplied with the following connecting styles:

- Insulation displacement (keystone) IDC
- PCB connection
- Patch cords

The USB series can be supplied using patch cords.

CONEC can also supply custom length patch cords for the RJ45 and USB series.
