

# LIGHTING

HALOGEN/LED AERODROME  
LIGHTS, SIGNS,  
FLASHING SYSTEMS...

## HALOGEN ELEVATED LIGHTS

### ML 121

- **halogen** 6,6 A elevated omnidirectional low/medium intensity lights with **integrated transformer** for stationary/mobile aerodromes/heliports
- APP - approach centre line and crossbar lights
- THR - threshold lights
- RWE - runway end lights
- TWY - taxiway edge lights
- FATO - final approach and take-off area lights
- TLOF - touchdown and lift-off area lights
- unserviceability lights (red)

### ML 122

- **halogen** 6,6 A elevated omni/bi-directional medium intensity lights with **integrated transformer** for stationary/mobile aerodromes/heliports
  - APP - approach centre line and crossbar lights \*
  - THR - threshold lights \*
  - RWE - runway end lights \*
  - THR/RWE - threshold/runway end lights
  - RWY - runway edge lights \*
  - TWY - taxiway edge lights
- \* one light output direction (one half) can be blinded

### TL 322

- **halogen** 6,6 A elevated omni/bi-directional high/medium intensity lights
  - APP - high intensity runway edge lights (CAT I-III) \*
  - APP - medium simple approach lights \*
  - RWY - runway edge lights \*
  - THR/RWE - threshold/runway end lights \*
  - TWY - taxiway edge lights
- \* one light output direction (one half) can be blinded

### TL 421

- **halogen** 6,6 A elevated unidirectional high intensity reflector lights for CAT I-III
- APH - approach centre line and crossbar lights
- ASR - approach side row lights
- THR - threshold/threshold wing bar lights
- END - runway end lights
